

LED PL BULBS

Energy Harness™ LED PL style bulbs are designed to replace compact fluorescent PL style bulbs. With half the energy usage of traditional lighting and no ballast required, these lights are sure to reduce your energy and maintenance cost as well as increase your light output. They are manufactured with aluminum and plastic eliminating traditional hazards of mercury and glass.

Energy Harness LED PL style bulbs are great for wall sconces, can light fixtures, wall pack lights, hallways, walkways, soffits, common areas and more. With easy installation and cleaner brighter light output over compact fluorescents, these lights help you start saving instantly. Upgrade your lighting today and see the difference.
