

Energy Harness® LED bollards are designed to replace traditional bollards. Rated for 147,000 hours with an output of 15W, these lights are an excellent replacement for up to 70W metal halide or high pressure sodium bulbs. Energy Harness® LED Bollards provide an easy to install modern fixture upgrade from traditional bollards. With integrated LED technology, the need for changing bulbs and ballasts is completely eliminated. Upgrade your lights today, increase your light output, and modernize the look of your fixtures all while lowering your energy cost!

## Applications

- Medical Facilities
- Schools
- Retail Centers

- Banks
- Universities
- More!

## Specifications

- Domed top
- Vandal-resistant screws
- IP65 rated
- Working temp: -40° - 104°F
- Extruded aluminum housing
- LED Cone Reflector
- Non-dimmable
- Mounting kit with 8" anchor bolts included
- Ballast bypass
- Surge protection
- Wide beam spread Type V distribution
- 42" standard height

## Accessories

Mounting kit with 8" anchor bolts included

LED Bollard	15W
EHC Part Number	EHF-BOLLARD-1550K-277-BR
Replacement	0-75W MH/HPS
Wattage	15W
Lumens	1631lm
Efficacy	101
Height	42.25" (1,073mm)
Diameter	7" (178mm)
Voltage (AC)	120-277VAC
Color (CCT)	5000K
