LED solutions that reduce your energy and maintenance costs
About Energy Harness

Established in 2010, Energy Harness Corporation (EHC) specializes in the manufacturing and nationwide distribution of high quality commercial LED lighting. Combining our wide range of products and technical expertise, we create innovative LED solutions that will reduce your energy and maintenance costs.

With multiple teams of experienced lighting professionals, EHC can offer engineering and technical support as well as in-house energy analyses to all prospective clients. Our wealth of knowledge in lighting consultation and installation enables us to be an integral part of the lighting process from planning and purchasing all the way to project completion.

Energy Harness® is headquartered in Cape Coral, Florida and along with our Midwest office in Indianapolis, Indiana we are able to shine our light on the entirety of the United States. With our lighting consultants and professional installation teams on call and ready to travel, quality light is always within your reach.
LED Interior Lighting

Government buildings should set an example for the rest of the community. By switching to Energy Harness® LEDs, you can do just that by making your facilities a shining example of efficiency.

Atmosphere

Government facilities can be a sensitive place. Put your occupants at ease with the clean, bright light that Energy Harness® provides.

LED PL Bulbs

Increased Productivity

LED lights have been proven to increase productivity by eliminating the distractions such as flickering or buzzing that are found in traditional lighting.1

Wireless Controls

Total control of your light will be at your fingertips with the assortment of EHC wireless controls.

LED Solutions | Recreational Area Lighting

Whether a park closes at sundown or stays open all night, proper lighting is vital. With Energy Harness® LEDs, you can rest easy knowing that your parks are a glowing sanctuary of security, efficiency and fun.

**Safety**
Even in the darkest of nights your parks can be a beacon of light with Energy Harness® LED lighting.

**Security**
With no dark spots or unlit areas, potential miscreants will have nowhere to hide.

**Efficiency**
Energy Harness® LED lights are designed to operate with more light output using less wattage. That means brighter light while reducing energy costs.

LED First Responder Lighting

Energy Harness® has been proud to light the way for the first responders in our hometown. We know the demands of a first responder station, and that allows us to provide the perfect amount of light to ensure they can more efficiently protect and serve your communities.

**Durability**
First responders work in an environment of constantly moving parts; luckily Energy Harness® carries fixtures that can stand up to the worst abuse.

**Reliability**
With the longevity and maintenance-free lifespan of Energy Harness® LED lights, first responders never have to worry about being left in the dark.

**Readiness**
The output of an Energy Harness® LED means first responders will have one less thing to worry about in an emergency.

Contact your Lighting Consultant today to discuss how you can upgrade your lighting with no money out of pocket!
WHAT THEY’RE SAYING

Over the past few years, Energy Harness® has been helping hundreds of clients across the United States achieve their energy goals while improving their quality of light. Here’s what some of them have to say about us.

“Energy Harness provides quality products, quality workmanship, and quality service. They expressed a level of care and concern for us as customers that I have not experienced with any other vendor.”

– PARIS PEGG, DIRECTOR OF THE MORRISON-REEVES LIBRARY

“Your employees were highly competent and extremely courteous during the installation process and you worked diligently to meet our needs… The Senior Center is now a brighter and better place because of this project.”

– SHARON PITCOCK, EXECUTIVE DIRECTOR OF THE PUTNAM COUNTY SENIOR CENTER

“If this were your money and you could start saving now, would you wait until next year to implement the LED technology?”

– CRAIG KINYON, CEO OF REID HEALTH
